McGill University - BA
Linguistics, with Great
Distinction

About Me

I'm a front-end web developer with a passion for improving everyday life through technology. As a former documentary film and TV editor, I've collaborated and problem-solved with many creative teams. As a developer, I use my storytelling skills to build intuitive and engaging user experiences. I want to join an enthusiastic team that combines logic and creativity to build accessible, purposeful web applications.

Work and Volunteer

Volunteer Mentor - Juno Web Dev Fundamentals workshop (2019)

- Supported approximately 40 students learning HTML and CSS.

Insight Productions - Story editor (2018)

- Managed a team of 5 editors on The Amazing Race Canada, one of the highest-rated shows in Canada.
- Mentored junior editors, designed episode story structure, and managed project timelines.
- Successfully implemented Trello-based workflow which streamlined the editing process and substantially reduced editor workload.

Freelance film and TV editor (2003-2019)

- Collaborated with key creatives to produce over 40 hours of film and television.
- Liaised between stakeholders such as producers and directors to resolve creative differences.
- Won several prestigious editing awards, including 2 Canadian Screen Awards.
- Integrated into existing workflows of multiple production companies.
